

PROJECT

DIGITAL DYNAMOS

1. Start by creating an HTML file to structure your webpage.
2. Include a head section with a title for your page.
3. Link a CSS file to style your webpage.
4. Design a header as a banner at the top of the page.
5. Highlight a special offer in the header using prominent text or styling.
6. Create sections for each product, incorporating an image, title, price, and description.
7. Use appropriate HTML tags for each piece of information, like ``, `<h2>`, `<p>`, and ``.
8. Apply CSS styling to enhance the visual appeal of the product sections.
9. Use CSS to create a grid or layout for displaying the three products side by side.
10. Ensure responsiveness by using media queries to adapt the layout for different screen sizes.
11. Add hover effects to the product sections for a dynamic user experience.
12. Implement a consistent color scheme and typography across the webpage.
13. Utilize CSS flexbox or grid for better alignment and spacing of elements.

14. Test your webpage in different browsers to ensure cross-browser compatibility.

15. Optimize images for faster loading and provide alt text for accessibility.

Remember to regularly check and update your webpage to keep it relevant and appealing to visitors.
